

Wonderglas with its lifetime warranty and superior surface protection is also heavier than standard sheet at 1500gms, thus allowing longer spans.

Also providing a relatively high shade factor, while providing plenty of soft, even light, it is much cooler below transparent sheeting.

Webglas GC (GC = gel coated surface) is providing its worth in buildings where steel and other roofing or wall cladding materials deteriorate or corrode at an unacceptable rate. Reinforced with a heavy gauge woven glass mat which provides continuous strength and protection in every direction. The overall strength is such that safety wire mesh is not required. This is an important benefit in chemically aggressive and corrosive environments where safety mesh is eroded and traditional steel cladding quickly deteriorates.
